

The Lady In the Moon

We have all seen the 'Man In The Moon' but has anyone seen 'The Lady in the moon'. In 1937 'The lady in the moon' was made into a postcard when it showed the different views of the Lady. The Lady comes into view five nights before the full Moon each month and fades four nights after. In China the lady is called Chang'e 'The Moon Goddess'.

Many postcards have shown the lady in or on the Moon. The Lady In The Moon postcard is an American postcard dated 1937 which was copyrighted by C.D.A. and has the number 'NO. 49774. the reverse shows different phases of the Moon with 'starts five nites before full moon each month'. It says 'place one cent stamp here' so it may even be Canadian.
